Project Officer (Ref: 2600511)
Centre for Learning, Teaching and Technology

Project Title: Redesigning learning outcomes and assessments in the era of generative AI: Evidenced-based authentic examples, innovation and capacity building
[Appointment Period: 1 year]

The appointee will provide technical and project support for the learning and teaching project titled “Redesigning learning outcomes and assessments in the era of generative AI: Evidenced-based authentic examples, innovation and capacity building”. He/She will be responsible for developing automated digital tools to assess the quality of students’ interaction and collaboration with generative AI (GenAI). Duties include conducting requirements analysis, developing and testing prototype tools, supporting the evaluation of students’ reasoning processes and interaction patterns with GenAI, preparing technical documentation and user guides, assisting in pilot testing with selected courses, supporting data collection and analysis, and providing technical support for project-related professional development activities. The appointee may also assist in project coordination, preparation of reports and dissemination materials, and perform other duties as assigned by the Director and Associate Directors of the Centre for Learning, Teaching and Technology. The initial appointment will be for a period of 1 year, subject to renewal based on performance and mutual agreement.

Applicants should have a Bachelor’s degree, preferably in Artificial Intelligence, Educational Technology, Computer Science, or a related discipline, with at least two years of post-qualification working experience. Experience and knowledge in programming, particularly Python, web-based application development, data analytics, natural language processing, or AI-related tool development, will be an advantage. They should have an excellent command of both written and spoken English and Chinese; have good analytical and problem-solving skills; be attentive to details; and with good interpersonal and communication skills. Applicants should also be self-motivated, able to work independently, and good team players.

For more details about this position, please contact Prof Susanna Yeung Siu Sze at siusze@eduhk.hk or Dr Gary Cheng at chengks@eduhk.hk.

Salary will be commensurate with qualifications and experience. Fringe benefits include leave and outpatient medical benefits.

The University only accepts and considers applications submitted online for this post. Applicants should complete the [online application form](#) and upload a full CV on or before **14 July 2026**. Applications which are incomplete or without the required documents may not be considered. Personal data provided by applicants will be used for recruitment and other employment-related purposes. For details of the Personal Information Collection Statement, please refer to <http://www.eduhk.hk/jobsopp/index.php?glang=en>.

All applications will be treated in strict confidence. Only those who are shortlisted will be contacted. The University reserves the right not to fill the position(s) advertised.

Further information about the University is available at <http://www.eduhk.hk>.
